Electronic Packaging and Production Index for 1986

Here is a list of articles and major news stories published in Electronic Packaging and Production in 1986. Listing is by title under the category considered to be the main theme of the article.

Assembly . . .

Assembly systems and materials

"A Machine for In-Line Assembly of Large SMT Boards, J. J. de Jong, Aug., pg 62.
"Adhesives That Possess a Science All Their Own," Linda Smith-Vargo, Aug., pg 48.
"Assemble PCBs at home, say British," T. Ronald Pound, Nov., pg 12.
"Assembly Challenges Robots," Charles-Henri Mangin, March, pg 53.
"Automation Boosts PCB Throughput," Robert Myers, March, pg 40.
"Automation on the Right Track," Robert Keeler, Feb., pg 24.
"Canadian Ford running SMT," Robert Keeler, Jan., pg 12.
"Choosing SMT and Setting Up a Facility," Howard W. Markstein, Jan., pg 74.
"Coatings Cover High-Volume PCBs," Linda Smith-Vargo, Feb., pg 148.
"Computers Power the Soldering Process," S. Leonard Spitz, Feb., pg 76.
"Conference favors automation," S. Leonard Spitz, Jan., pg 20.
"Construction of an Automated Soldering Plant," G. Zoly, June, pg 98.
"Delco committed to SMT," Robert Keeler and Linda Smith-Vargo, Feb., pg 13.
"Europe displays SMT prowess, David Boothroyd and T. Ronald Pound, March, pg 12.
"European managers air views on SMT," Robert Keeler, Sept., pg 14.
"Flexible Manufacturing Increases Productivity," S. Leonard Spitz, March, pg 34.
"Future Pacesetters II: The Anatomy of Winning," S. Leonard Spitz, July, pg 66.
"Gaining the Edge With Manufacturing Engineering," S. Leonard Spitz, May, pg 34.
"Hand Tools for Today's Technology," Susan Crum, April, pg 80.
"High First Time Wave-Solder Yields Demand Machine Controls," Joe Keller, Sept., pg 98.
"How to Choose a Component Locator," Gunjan Bagla, Nov., pg 32.
"IPC study looks at PWB assembly," Robert Keeler, Nov., pg 22.
"Japan's equipment has surprises," T. Ronald Pound, April, pg 12.
"Largest Electronic Manufacturing Set the Industry's Scale," EPP Staff, July, pg 61.
"Lasers Excel as Manufacturing Tools," John Harris, June, pg 70.
"Lead tinning is automated," Howard W. Markstein, May, pg 14.
"Making Your Mark," Margaret A. Choudhury, July, pg 47.
"Maximize the Throughput of Automatic Insertion Equipment," S. A. Cooper, Aug., pg 69.
"Multiple Board Manufacturing," Rich Hurst, Aug., pg 58.
"New standard to address SMD tape," Robert Keeler, July, pg 16.
"Optimizing the Wave Soldering Process," K. M. Lin and R. N. Kacker, Feb., pg 108.
"PCB assembly robots shown," Robert Keeler, July, pg 16.
"Pick and Place Machines Boost Productivity and Offer Unlimited Flexibility," Bhogi Boscha, Dec., pg 66.
"Products Join Up to Combat ESD," Susan Crum, Sept., pg 67.
"Re-defining Solder Joint Acceptability," Joe Keller, Feb., pg 101.
"RISE improves reliability," S. Leonard Spitz, Sept., pg 20.
"Selective plating eliminates solder," David Buckley, Feb., pg 12.
"SMA Promotes Automation and Boosts Machine Vision," S. Leonard Spitz, Jan., pg 82.
"SMD Placement Using Machine Vision," Jim Field, John Payne and Chris Cullen, Jan., pg 128.
"SMT Expands Options in Japan," Hayao Nakahara, Jan., pg 58.
"SMT is Poised for Penetration of European Manufacturing," Ronald Pound, Jan., 66.
"SMT line handles product variety," T. Ronald Pound, Dec., pg 13.
"Solders With Precision," Linda Smith-Vargo, April, pg 92.
"Survey Results Open the Door on Management," Susan Crum, May, pg 48.
"Systems Design Shapes Production Workstations," Robert Keeler, Feb., pg 128.
"Teamwork solves QC problems," Robert Keeler, May, pg 12.
"The Contractors — Building Business Via SMT," Don Brown and Paul Gallanda, May, pg 24.
"The Removal and Replacement of SMCs," Linus Wallgren, Jan., pg 102.
"Wave Solder Defects," J. Gordon Davy, Feb., pg 120.
"Workshop fosters SMT interest," Robert Keeler, July, pg 14.

Assembly test and inspection

"ATE urged for process control," Robert Keeler, June, pg 18.
"Automated IC Handlers Meet Today's Test Requirements," James A. Koren and Robert J. Wurscher, May, pg 66.
"British Advances in Test and Measurement Equipment," H. A. Cole, Nov., pg 44.
"Burn-in Board Testing Ensures Reliable Results," Michael R. Schell, April, pg 100.
"CAD/ATE Links Compete With Self-Learn and Manual Entry Modes," Russell Brudnicki, Nov., pg 29.
"Computers Aid Integration of Product Design and Testing," Thanasis Kalekos, April, pg 104.
"Devices outrun test system," S. Leonard Sptiz, Dec., pg 16.
"Environmental Stress Screening Pays High Dividends," S. Leonard Spitz, Aug., pg 28.
"Features aid MV inspection," Robert Keeler, Sept., pg 15.
"In-Circuit test to continue," T. Ronald Pound, Oct., pg 22.
"Inspection Equipment Exposes Quality of Soldered Joints," Ronald Pound, Feb., pg 84.

Index for 1986

"Loaded Board Inspection," S. Leonard Spitz, Dec., pg 46.
"Making SMT Assemblies Testable," Howard W. Markstein, Oct., pg 60.
"Mix and Match Testing Modes," James M. Brown and Peter J. Hand, Aug., pg 26.
"Probes Ease Testing of Hybrids and SMT Assemblies," Charles M. Tygard, Feb., pg 205.
"Program Generation for Functional Test Strides Ahead," Robert Keeler, Sept., 57.
"Software Charts the Course of Component Testing," T. Ronald Pound, June, pg 105.
"Test Strategy Development Means Cost Savings," J. Kroening, April, pg 112.
"Testability Circuit Solves SMT Board Access Problems," Jon Turino, Jan., pg 110.
"Testing inherits automation," John Harris, Feb., pg 12.
"Touch Panels Make Their Mark on Production Test," Brad Leland, Aug., pg 38.

Circuit fabrication . . .

Hybrid circuit production

"Copper Thick Film Strives for a Comeback," Jerry E. Sergent, Sept., pg 39.
"Firing Thick Film Hybrids," Howard W. Markstein, Sept., pg 30.
"Hybrid circuit technology shared," Howard W. Markstein, Jan., pg 13.
"Hybrid circuits isolate 8 kV," Howard W. Markstein, Dec., pg 13.
"Hybrid circuits keep pace," T. Ronald Pound, Nov., pg 16.
"Hybrid packaging chosen for space telescope," Howard W. Markstein, Aug., pg 12.
"Hybrid use increases," John Harris, March, pg 18.
"Hybrids produced for satellites," John Harris, May, pg 14.
"Metalization for hybrids," S. Leonard Spitz, Aug., pg 14.
"Test and Inspection of Hybrid Microcircuits," Jerry E. Sergent, Howell H. Chiles and Robert Power, Feb., pg 140.
"Packaging options multiply at ECC," T. Ronald Pound, Aug., pg 13.
"Process fits in hybrid niche," T. Ronald Pound, July, pg 13.
"Thermal Images Show Hybrids' Defects," Hugh Danaher, Sept., pg 34.
"Thermosonics bonds chips," John Harris, April, pg 14.
"VLSI Hybrids Are Built With Modular Parts," Jim Angeloni, Sept., pg 28.

Printed circuit production

"A Look at Developments in Multilayer Fabrication," Gerald L. Ginsberg, June, pg 34.
"Additive Circuitry Ready for Surface Mount," Howard W. Markstein, Dec., pg 26.
"Automation in the Japanese PWB Industry," Hayao Nakahara, March, pg 28.
"Autos use more printed circuits," T. Ronald Pound, July, pg 13.
"Bare Board Test and Inspection Assures Product Reliability," Howard W. Markstein, April, pg 69.
"Circuit Board Requirements Challenge CAD Systems," Paul H. Ricker, March, pg 60.
"Commanding Control of the Plating Process," Linda Smith-Vargo, Sept., pg 48.
"Electronic chemicals demand increases," Linda Smith-Vargo, Jan., pg 12.
"Ensuring Quality and Reliability in SMT Designs," Jack Pestaner and Mike Bergath, Oct., pg 42.
"Focus on Photoimageable Solder Masks," Linda Smith-Vargo, June, pg 87.
"High-performance laminates to grow," Howard W. Markstein, Feb., pg 16.
"High Speed Digital Printed Circuit Boards," Robert Keeler, Jan., pg 140.
"Hot-Air Leveling Excels for Surface-Mount Boards," Donald A. Elliott, Feb., pg 91.
"Implementing CAD/CAM: A Primer for Managers," Paul F. Lando, May, pg 42.
"In Pursuit of Good Microwave Board Performance," Michael P. Casper and Ron Petrick, Oct., pg 32.
"Intelligent Techniques for Printed Circuit Plating Success," Linda Smith-Vargo, Dec., pg 24.
"Is High-Voltage Testing of Bare Boards Necessary?" Robert Wolfe, Gary Wall and L. H. Wentworth, Aug., pg 34.
"Japan has printed circuit show," Kinshi Itoh, Sept., pg 15.
"Japanese PWB process revealed," Kinshi Itoh, May, pg 13.
"Japan's PWB makers set to resume growth," Hayao Nakahara, Oct., pg 13.
"Laminates control TCE problems," Susan DePetris, June, pg 16.
"Laminates Pressured by Economic and Performance Issues," Howard W. Markstein, June, pg 30.
"Lasers drill multilayers," John Harris, April, pg 13.
"Laser forms fine lines without resist," Robert Keeler, Sept., pg 14.
"Liquid Photoresists Yield High Resolution in Printed Circuitry," Koshy John, Gordon G. Perrin and Saulius Simoliunas, Dec., pg 32.
"Metalized Film Flex Circuits Yield Fine Lines," Linda A. Hoitt and Darrell Stoddard, June, pg 64.
"Molded board use to rise," John Harris, April, pg 13.
"Molded Circuit Boards Compete for High-Volume Markets," Robert Keeler, June, pg 54.
"Molded Circuits Enhance Use of Additive Process," David C. Frisch and Yu-Ling Teng, Feb., pg 176.
"New Board Overcomes TCE Problem," John R. Hanson and James L. Hauser, Nov., pg 48.
"100 Percent Automatic Routing: What Does It Really Mean?" David Rager, March, pg 46.
"PCB problems aired at IPC," Linda Smith-Vargo, June, pg 13.
"PCB process integrates plating," Robert Keeler, July, pg 12.
"Phototool's time constant is changed," T. Ronald Pound, Dec., pg 14.
"Pins outperform plated holes," Howard W. Markstein, Feb., pg 30.
"Planar Resistor Technology for High-Speed Multilayer Boards," Bruce Mahler and Paul Schroeder, Jan., pg 150.
"Plated Through Hole Reliability," S. Leonard Spitz, Oct., pg 34.
"Quality — The Team Approach," Patricia Feetham, June, pg 78.
"Reel-to-Reel Flexible Circuit Processing Equipment," Walter R. Schurman and David L. Bagley, Nov., pg 38.
"Resins and Tooling for Injection-Molded Circuit Boards," Dave Frisch and Tom McNamara, June, pg 46.
"Screen Cleaning Process Combines Economy and Safety," Charles Fritschen, Feb., pg 198.
"Seven Steps to Cleaner Water," James M. Green, Oct., pg 77.
"SMOBC Clears the Way to Fine-Line Circuitry," Robert Keeler, Oct., pg 29.
"SMT boosts additive PCBs," John Harris, April, pg 16.
"The Fine-Tuning of Plasma Desmearing," Michael T. Mocella, Aug., pg 55.
"Unbussed Plating Salvages Gold-Damaged PCBs," Chuck Denofrio and JoEtte Denofrio, Feb., pg 162.
"U.S., Japan exchange PCB engineers, T. Ronald Pound, June, pg 12.
"Venture to make molded boards," Susan DePetris, Aug., pg 14.
"Weak Knees Not a Threat to PC Board Quality, M. Reithinger, Feb., pg 182.

Index for 1986

Packaging . . .

Component, circuit and systems packaging

"A New Approach to LCD Reliability," James Roman, Sept., pg 108.
"Avionics and Aerospace Systems Packaging," Howard W. Markstein, July, pg 24.
"Cash in Semicustom Chips for Manufacturing Profits," Ronald Pound, March, pg 68.
"Conductive Thermoplastics Excel in ESD and EMI Protection," William Wright, Oct., pg 69.
"Choosing the Proper Device Sealing Technique," David Rossi, Feb., pg 188.
"Commitment made to GaAs, SMT, Margaret A. Choudhury, March, pg 14.
"Computer-Aided Design of a Microwave Antenna Housing," Pamela L. Parsons, David Purnell and Marc Whittlesey, July, pg 36.
"Cooling a Superfast Computer," Richard D. Danielson, Nick Krajewski and Jerry Brost, July, pg 44.
"Cost and Reliability Drive Computer System Packaging Design," John T. Kolias, Dean W. Masland and Robert L. Weiss, Oct., pg 80.
"Electronics pace specialty metals," T. Ronald Pound, June, pg 12.
"Electronic Packaging Achievement Award," Dan Amey, Jan., pg 132.
"Expense, Availability Direct SMT Growth," Don Brown, James Bracken, Anthony Manna and John Brasch, Jan., pg 94.
"Facility to make VHSIC package," Robert Keeler, Oct., pg 14.
"Flexible Circuits Support High Density, High Speed Packaging," Ronald Pound, April, pg 60.
"GaAs bumps ECL," John Harris, March, pg 13.
"GaAs grows in Europe," John Harris, May, pg 16.
"Heat-pipe meeting in Japan," Kinshi Itoh, June, pg 13.
"Heat sinks cool LCCS," David Buckley, March, pg 12.
"High I/O count package problems," Howard W. Markstein, Jan., pg 24.
"IEPS conference reviews SMT," S. Leonard Spitz, Feb., pg 20.
"Improving Circuit Reliability With Heat Pipes," A. Basiulis and C. P. Minning, Sept., pg 104.
"Innovative products cited in U.K.," T. Ronald Pound, Jan., pg 13.
"Japan's Swing to Chip-on-Board," Hayao Nakahara, Dec., pg 38.
"Leaded component use declines," John Harris, Feb., pg 13.
"Leaded packages hold SMDs," T. Ronald Pound, July, pg 12.
"Maintain the Speed of GaAs in Digital Systems," T. Ronald Pound, Oct., pg 50.
"Membrane Switches Endure Harsh Conditions," John Harris, Jan., pg 158.
"Monitors Display Variety," Russ Froehlich, Sept., pg 85.
"Multilayer Ceramic Arrays Solve Problems in High-Density Packaging," Harry Hazzard, Feb., pg 214.
"Packaging to Pace the Heart," Robert Keeler, July, pg 28.
"PCBs shrink for mobile radio," S. Leonard Spitz, May, pg 12.
"Power Distribution Using Bus Bars," Kevin Colvin, May, pg 72.
"Pressure Sensors Packaged in Plastic," Randy Frank and Vic Adams, Dec., pg 62.
"Printed Circuits Mirror Integrated Circuits," William Loeb, Feb., pg 168.
"Semicustom boom," John Harris, March, pg 1[illegible].
"Sensor packaged for high temperature," Howard W. Markstein, Nov., pg 13.
"SMT doubles VAX memory," S. Leonard Spitz, Nov., pg 13.
"SMT packaging formats proposed," David Buckley, Aug., pg 13.
"SMT problems aired," Howard W. Markstein, Jan., pg 18.
"Soldering and Sealing Package Lids," R. A. Bourdelaise and F. E. Hill, Aug., pg 74.
"Surface mount increases memory," S. Leonard Spitz, April, pg 16.
"Surface Mounting Fine-Pitch Chip Carriers," Karl W. Rosengarth Jr. and Ernel R. Winkler, Jan., pg 120.
"Switching Power Supplies," Fred Heath, Jan., pg 166.
"Systems Approach to High-Speed Digital Packaging," Steve Lockard, Sept., pg 92.
"TAB compresses mainframe size," Howard W. Markstein, Nov., pg 12.
"TAB development intensifies," Howard W. Markstein, Aug., pg 12.
"TAB Rebounds as I/Os Increase," Howard W. Markstein, Aug., pg 42.
"Temperature testing enclosed areas," David Buckley, Feb., pg 28.
"VMEbus market surges ahead," John Harris, May, pg 13.
"Why is the U.S.A. Behind in SMT?" Michael Lancaster, May, pg 28.

Connectors, interconnections, and packaging hardware

"Coax Fits Into Tight Spaces," T. Ronald Pound, March, pg 90.
"Computer has 22-layer backplane," S. Leonard Spitz, April, pg 20.
"Connector solders self," John Harris, March, pg 16.
"Connectors Change With the Times," John Harris, April, pg 38.
"Designers Lay Out a Course for SMT Connectors," William J. Clark, April, pg 44.
"Euroconnectors: A Good Idea Reaches Maturity," Robert Keeler, March, pg 76.
"Fasteners Take on New Shapes," Margaret A. Choudhury, May, pg 58.
"Fiber Optics for Short Haul Applications, Robert Keeler, Dec., pg 54.
"High-density connectors soar," John Harris, April, pg 12.
"Plating for Economic Success," David R. Mason, April, pg 34.
"Ribbon Cable for Reliable Interconnections," Bennett W. Brachman, July, pg 58.
"Variety of Connectors Support Communications Equipment," Gerald L. Ginsberg, April, pg 52.

Reprints

Reprints of articles which have appeared in Cahners' magazines can easily become an important means of increasing your marketing results. This complete reprint service is available to you at a very low cost.

There are innumerable ways Cahners' reprints can be of vital assistance to your company's total marketing program. They are exceptionally valuable promotion pieces, particularly when you use them as part of a Cahners' Direct Mail Program.

Here are some uses which just scratch the surface of the many ways you can make reprints go to work for you and build your company's profits.

electronic packaging and production
